ALBERT VON AACHEN

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 20 pages. OCLC Number: 214044904 Excerpt: . . . more general structural analysis codes. Collectively, the development of these various specialty methods constitute a new discipline identified as computational composite mechanics. These methods encompass aspects of composite mechanics, impact, progressive fracture, and component specific composite structural analysis. The application of computational simulation to select examples are briefly described in terms of the importance of the behavior (1) simulated, the simulation procedure, typical results obtained, and (4) (3) (2) interpretation and significance of these results. Collectively, these examples demonstrate the effectiveness, and perhaps the only coupled integrated means of computational simulation for determining the complex structural response of aerospace propulsion service environments. in composite structures REFERENCES o f Chamis, C.
