## MAKING THINGS INTERNATIONAL 1: CIRCUITS AND MOTION

University of Minnesota Press, United States, 2015. Paperback. Book Condition: New. 250 x 176 mm. Language: English . Brand New Book. Building on recent debates in critical social theory and international relations, *Making Things International I: Circuits and Motion* presents twenty-five essays that engage the global, the local, and the international through the lens of objects. It represents the first substantial new materialist intervention in global politics and international relations, offering a diverse and provocative set of reflections on how different objects create, sustain, complicate, and trouble the international. Problematizing the stuff of global life, *Making Things International* focuses on contemporary materialist scholarship on the international realm. The first of two volumes, these original contributions by both new and established scholars examine how war, diplomacy, trade, communication, and mobile populations are made by things: weapons, vehicles, shipping containers, commodities, passports, and more. The authors demonstrate how mundane, everyday objects not normally understood as international are in fact deeply implicated in how we think of the world: blood, garbage, viruses, traffic lights, clocks, memes, and ships ballast.
