

The Interpretation of Radium; Being the Substance of Six Free Popular Experimental Lectures Delivered at the University of Glasgow

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

(Mitchell Kuhn III)

THE INTERPRETATION OF RADIUM; BEING THE SUBSTANCE OF SIX FREE POPULAR EXPERIMENTAL LECTURES DELIVERED AT THE UNIVERSITY OF GLASGOW

To save **The Interpretation of Radium; Being the Substance of Six Free Popular Experimental Lectures Delivered at the University of Glasgow** eBook, remember to refer to the web link below and save the file or gain access to additional information which are have conjunction with THE INTERPRETATION OF RADIUM; BEING THE SUBSTANCE OF SIX FREE POPULAR EXPERIMENTAL LECTURES DELIVERED AT THE UNIVERSITY OF GLASGOW ebook.

Theclassics.Us, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: .strips. The uppermost (I) is ordinary helium. The second and third (II and III) are two photographs obtained from the gas generated by radium. In the second an exposure of twenty minutes, and in the third one of five minutes I38 HELIUM FROM URANIUM AND THORIUM were given. The lowest spectrum (IV) is that of hydrogen. It will be seen that many of the helium lines are present in the spectrum of the gas from radium. The other lines are those of hydrogen, due, no doubt, to the presence of a trace of moisture. The figures above and below the plate refer to the stronger lines of helium and hydrogen respectively clearly visible in photograph II. They refer to the wave-lengths in Angstrom units (10 metre). It must be remembered that the (visually) brilliant yellow line D_s, owing to its colour, appears far less intense in the photograph than the blue and violet lines. I have been engaged for four years in an attempt to detect the production of helium from the primary radio-elements uranium and thorium, and I have recently succeeded in proving in both cases that helium is produced, and, moreover, that the rate of production is almost exactly what is to be expected from the theory of atomic disintegration. This quantity is about one five-hundred-thousand-millionth of the mass of the uranium or thorium per annum! A photograph of the apparatus employed, as it at present stands in the Physical Chemistry Laboratory,...
