

CrS Report for Congress: North Korea s Nuclear Weapons Program: November 8, 2002 - Ib91141

By Larry a Niksch

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.North Korea s nuclear weapons program became an immediate foreign policy issue facing the United States because of North Korea s refusal to carry out its obligations under the Nuclear Non-Proliferation Treaty (NPT) and other nuclear accords it had signed. North Korea has constructed nuclear reactors and a plutonium reprocessing plant at a site called Yongbyon. U.S. intelligence assessments have concluded that North Korea probably has manufactured at least one nuclear weapon. The United States and North Korea signed an agreement on October 21, 1994, that offers North Korea a package of benefits in return for a freeze of North Korea s nuclear program. Benefits to North Korea include: light water nuclear reactors totaling 2,000 electric megawatts; shipments of heavy oil to North Korea (50,000 tons in 1995 and 500,000 tons annually beginning in 1996 until the first light water reactor is built). The pace of implementation of the Agreed Framework has been very slow. Instead of the original target date of 2003, it generally is estimated that completion of the light water reactors will not take place...
