Excerpt: . . . is faith the basis of knowledge 27 rails in their true position again. If those lines are straight ones, they will see two straight lines enclosing, or tending to enclose a space. The other illustration, of the same hypothesis, is just of the same kind. A world is supposed where little boys can never by any chance add two and two together, but what a jack in the box, in the shape of a unit, jumps into the answer and turns it into five. Assuming that none of them had wit enough to detect the trick, their sums would doubtless be always wrong: but not because they would conceive that two and two make five, but because the invariable association would be so strong, they could never think of two and two, but always of two, one, two. Like too many in this world,...
